

Below is the information extracted from the patent topic model for the second topic.

word_scores_top10:

- radar:0.1025
- firearm:0.0876
- arc:0.0746
- odd:0.0729
- subsystem:0.0692
- processorbased:0.0635
- coupon:0.0625
- student:0.0612
- operatively connected:0.0555
- tracker:0.0538

topic_words_top15:

[radar, firearm, arc, odd, subsystem, processorbased, coupon, student, operatively connected, tracker]

KPIs:

- mean_prop: 0,0123074959013592
- growth_pct: -13,02
- last_year_prop: 0,00260416666666667
- peak_year: 2015

Your task:

1. Assign ONE academically appropriate label (3–6 words).
2. Provide a one-sentence description of the technological scope.
3. Provide a one-sentence justification referencing specific keywords and/or KPI patterns.
4. Output MUST follow this exact JSON format:

```
{  
  "topic_label": "",  
  "description": "",  
  "justification": ""  
}
```
